Location: San Diego, CA

## SUMMARY

---

I am a bilingual professional with a strong foundation in data analysis and econometrics applications. My expertise in computing knowledge, data manipulation, and financial modeling will become a valuable asset to your company.

## EDUCATION

---

Bachelor of Science in Mathematics and Economics with high distinction

University of California San Diego, 2021-2025

- Coursework included economics applications, econometrics, mathematical models, and statistics.

Minor Degree in Data Science

University of California San Diego, 2021-2025

- Coursework included data analysis, data structure, machine learning, and coding with various languages (Python, Java, etc.)

## Experience

---

UC San Diego Economics Research lab

University of California San Diego, 2024-2025

- Main coder in Research labs hosted by UC San Diego Economics department.

Utilized my strength in python coding and web scraping

## SKILLS

---

- **Bilingual proficiency:** fluent in both English and Chinese. I am capable of conducting businesses and communicate with clients/colleagues in both languages.
- **Programming skill:** proficient in many major computing languages like Python, Java, R, and Stata
- **Data Analysis:** sufficient experience in data analysis, modeling, web-scraping and software development
- **Collaborative coding:** skilled in using Github for coding collaboration, version control, and repository management
- **Spreadsheet expertise:** capable of in Excel and Google Sheets for data manipulation, pivot tables, and financial modeling.
- **Econometric modeling:** experience in running regression analysis, forecasting, etc. using Stata and R
- **Front-end experience:** strong experience in website development using html. Proficiency in new frameworks such as svelte.
